

The background of the cover features a close-up of a human hand, palm up, with fingers slightly spread. In the center of the palm, a glowing, stylized atomic model is superimposed. The atom has a bright, yellowish-white central nucleus and several elliptical, glowing blue orbits. Three small blue spheres, representing electrons, are positioned at different points along these orbits. The overall lighting is soft, with a warm glow emanating from the atom, contrasting with the cooler tones of the hand and the dark background.

Foreword

Mankind is in the 6th mass extinction and many Scientists believe we won't be alive after 2030, this is 7 years away. Humans must move from Ignorance to Intelligence or they simply won't survive.

It is realistic to expect the present global population of 8 Billion to drop to 4 Billion by 2030 as many factors are at work and everyone is worried due to new bioweapons, vaccines, new virus or pandemics as 300 global biolabs make new items to destroy mankind.

Both Nikola Tesla who discovered the frequency in 1896 was a true genius with over 70 inventions and followed by Dr Royal Rife in the 1920s verified this Science by healing 16 of 16 terminal cancer patients yet the medical industry tries to hide this natural healing as they sell pills and hospital treatments.

The good news is that the war between dark and light is ending after thousands of years so there will be an upgrade as we move from 3D to 4 and 5D. Some say we are already in 4D.

I entered the Quantum healing world in 2005 as I was near dead after stroke and near fatal heart attack, zero energy and barely survived as Quantum healing kicked in rapidly and I have used this to beat severe Covid in 7 hours, Ebola in 8 hours, Cancer 3 times in 1 year and I am far superior to how I was 17 years ago. Reborn and happy to share the good news, innovation and technology.

Quantum energy or the Mechanix or Universal energy is all around us so I found if we just tap into it we can find warp speed in healing almost any disease in a very short time and this is 100% natural.

I hope you will enjoy the book and shorten your learning curve and especially remove any illness and have a good life as sadly we will see many die in the coming years...Quantum healing is the solution to full health and a long life as ignorance is removed and you become an intelligent life form and we have made this easy to do. There is now a desperate need for natural healing and clinics so you are welcome to join us or one can remain blissfully unaware as events unfold and take the masses.

China now has an 80% infection rate and the USA is already at 45%, this is unheard of in modern history yet we can beat every bio-disease they bring. I do hope you have the free will and an open mind to see the solution and use free energy healing for any illness or to extend your life.

Sincerely,

Alan Brown.

Chapter 1

Why This Book?

As a guide for energy healing. Only in the last 5 years has there been a huge surge of interest in healing natural and Quantum and rife or Tesla technology, today I would estimate over 1 million users compared with a fraction of that 10 years ago. Still this is nothing compared with an 8 billion global population. I am one of the few original users since 2005 yet today there seems to be dozens of experts. We do not chase money, our prime interest is to hear our customers removing their illness. I have used Quantum and rife now over 30000 hours personally so know quite a bit from this experience.

We live on a planet with over 10000 forms of disease or virus or bacteria or new bioweapons.

Humans have immense potential yet I feel we only live at a fraction of our capacity. On a scale of 1 to 10 most of us are around a 3 and few are above an 8, why can't we all live at a 10?

Many reasons, many problems, with a system or Matrix that keeps us down or in servitude.

The world and politics now in January 2023 is a mess. With Governments bankrupt, war becomes the next scenario as in the past. Are we not advanced yet enough to know war is obsolete and no government should be corrupt as they work for the people or are people just taxpayers?

My brief history of how I entered this field in 2005.

I was a Captain in the Caribbean on luxury yachts and had a great life with no worries until I was age 48 and had my first stroke and a near fatal heart attack as my body fell apart in 2005.

I searched every means to find health again and conventional medicine did not work for me or pills or specialists until I was sent to a Quantum practitioner in 2006. I was a total mess, no energy, depression, broke and down and out. After several sessions with this technology I began to recover quickly and at 15 hours of therapy, I jumped into this field firstly to stay alive and secondly to grow by frequency and vibration.

In 2014 I was in West Africa when Ebola broke out and dead people lay on every street corner as few ambulances were available and took an average of 8 hours to remove them while Ebola was airborne. I became infected with high fever and strong flu symptoms and went onto one of our units for 1 night not knowing if our program would work or not. I awoke the next morning after 8 hours feeling normal and fully recovered. 16000 died in that test with many fine Doctors and good people. It was a test or an accidental virus release from a biolab.

I began making units in 2015 and still had many health problems so have always been a serious user.

In early January 2020 I went down again with Covid 19 for 28 days as I tried to produce a natural antibiotic and it failed so again I used a unit for 1 night and it took 7 hours to kill the pneumonia and feel 100% normal.

In 2021 I went down with Cancer for the first time and used our wireless Quantum to do a test not expecting anything yet within 10 minutes it located the cancer in my hernia and gave several sharp twinges directly in that area and stopped within 1 minute. Remarkable and it did feel very strange yet the next day all inflammation went down and it was removed.

Again in September 2021 I went down with Cancer and it took 1 week to remove as more advanced, using both the TENS pads and wireless so a double treatment.

Again in March 2022 a third round lasting 10 days and using both methods to remove it again. Needless to say when a person becomes active with Cancer one needs to test every month to find it early and kill it early. If one is unaware and moves into stage 4 can be terminal as so late.

To be able to get a biofeedback in 10 minutes and know if you are positive or negative is priceless. One can use the wireless or TENS pads or both is best. If positive, just treat it until a new test shows negative.

The interesting part here is the speed of removal for Covid and immunity took 7 hours.

Ebola as a deadly disease took 8.

Cancer early stage can be removed in 10 minutes or later if you become late stage. A person stage 4 can take 4 to 6 weeks to recover using this technology however many are lost if in terminal condition.

This book is a guide to 100% Natural healing at home or in a clinic and covers the A-Z forms of disease.

Many humans are skeptical and cynical and this shoots them in the foot or life. Those who have an open mind and serious health issues can rapidly recover and this innovation is simple to use and fully automatic. If we have to sleep 8 hours a night, why not use this while sleeping for healing and to grow on a Quantum universal intelligence level?

According to the WHO World Health Organization, every day 400000 people die globally due to 1 of the top 10 diseases. Now if we add bioweapons the number moves to 600000 daily. We are not winning unless we adopt new technology and move from ignorance to intelligence.

It has taken 10 years for mankind to start seeing and using this tool called rife or Tesla Tec. 10 years ago you could ask 100 doctors if they knew of this and 99 would say no. Today 10 would

say yes and 3 are using it for their own families. It takes time to spread the good news or to survive and learn.

The primary reason for this book is a guide to using rife machines and the Quantum energy field.

Most people on receiving their unit are a bit lost or intimidated by this Sci-Fi method yet many are up and running in 1 day depending how easy the unit is to use.

I have been in this field now for 17 years yet would have died by 2006 without using it. I use my unit 24 hours a day on the Quantum wireless and while sleeping I use the TENS pads for severe conditions. At age 66 now I do not expect to live forever yet have already had a huge 17 year life extension. Anyone can do this. My job is to assist to make it easy and effective.

Our units range from a very modest \$700 to \$4000 range and they have a lifespan of 5 plus years. This is a very low investment to be able to deal with 3900 forms of disease and rapid healing at home.

Quite frankly after the last 3 years, this is the low cost and fastest way to deal with almost any health issue so I do not use pills or hospitals or only as a last resort. Had I used the old medical system I would easily have spent \$300,000.00 on medical bills especially in the USA yet I only use an Elite model primarily at a value of \$1200 with Quantum wireless so no wonder Big Pharma does suppress this and does not want you to find it.

Chapter 2

Frequencies and Healing

Let's look at a few samples as many still believe this only removes worms which is suppression or the dying system still wants you to take pills. Of the 25000 types of pills how many actually remove the root problem? Or do they treat symptoms? Quantum healing goes to the root problem and removes it on a cellular level and often with remarkable speed. Lyme disease has millions suffering yet can be removed with this technology in under 12 hours.

My favorite frequencies are 20 hz, 120 hz, 727 hz, 728 hz, 800 hz and 880 hz. These are also called some of the universal sets. Just allowing these frequencies to flow through your body automatically repairs problems either using the wireless or while sleeping each night with TENS pads below the feet and feeling nothing yet fully active from feet to head for full body rejuvenation.

Everything in life is energy frequency and vibration. If we allow these frequencies to run through a body it will automatically rectify, rebalance or remove problems so we are free to have a higher grade life, live longer and happier. What can be more important?

We started producing the Quantum wireless 2 years ago as we know many are lazy or want the easy way to use this and be completely wireless over a very long range or sleep with it just a few feet from the bed.

Our units can be programmed with 10 frequencies so you can custom load your unit for a very precise or wide range of healing.

Our program 6 is the universal set with frequencies 20 120 528 727 728 787 800 880 5000 10000 so if there is 1 program to use seriously is this one to work on over 300 health issues and extend your life.

Dr. Royal Rife proved this technology works by 1920 and healed 16 out of 16 terminal patients with cancer. This is 100 years ago so why are Doctors and Hospitals not using this remarkable tool? Big pharma says you must buy pills or use chemotherapy etc and all the side effects they come with. Both Rife and Tesla did not die well as they were suppressed and removed. Tesla was strangled to obtain his patents and is currently used today by the military and the dark ones. Rife died penniless and painfully.

Mankind must learn and grow and use the latest technology or will not survive. We are slow to learn and most are unaware of what is going on as 90% may be removed in this great culling. The funny part is the dark ones don't want to die yet are being hunted down by the light and exterminated.

The light forces have ended the war by removing the dark so the next phase will be enlightenment that will take time and you may have heard the alien med beds will become available for those who have severe to terminal illness.

Another vast improvement is to improve your diet and supplements and exercise is good and healthy.

One of the major factors with ill persons is are you acidic or alkaline? Those who move to an alkaline level rarely have disease so again why diet is the number one factor with a good lifestyle.

Energy healing and Quantum healing with real equipment is simple to learn and implement in your life. One lady in North Carolina ordered a unit and the same day tested positive for arthritis and after therapy for several hours she was delighted to have slept soundly for the first time in years. Liz in California had dementia for many years and after 2 months was delighted to say her feeble mind was gone and active again. Because we all age and grow weaker does not mean we must accept a senile life, or live with three forms of disease because we give up. I remove anything that comes my way and so can you, be free, be smart.

Chapter 3

How to Use Energy Healing

You may already have a unit or a signal generator and I have bought over 10 in the past 6 years and I only use the best available as I have many health issues and some severe such as cancer too often.

The primary reason one should have a real unit is ability to work on 98% of disease which is realistic as Tesla discovered the frequency in 1896 so we have had over 100 years to perfect and improve this field vs the pill guys with 25000 options yet claim to have a perhaps 5% cure rate. With some pills at \$50 a pop I understand why they make them yet our interest is not money it is to remove the root cause in the shortest time and cost available. In simple terms if I used the old medical system I would have spent over \$300000 with my issues in the last 17 years and would still have died with certainty.

We only need to run the right frequencies for your body with the right power level for enough time to remove that issue and then free to start on the next issue.

One issue people have is to consider this medicine. I do not think of this at all as a painful medicine, it is a 100% natural alternative as a life machine that I control and run as I need and always happy to remove another disease. It is a friend and we should never think of it as negative.

One lady customer 2 years ago bought one of our small units and complained it did not work immediately as she had cataracts and she stopped using it at 13 hours as she wanted a 5 minute miracle. There is no 5 minute miracle yet, use the equipment and let it run long enough to work.

Had she let it work for several weeks her results would have been different so she remains one of our few failures. Impatient people should get instant results if they exist or perhaps laser or eye surgery.

Another observation I have after 17 years is people give up too quickly, They resign and die. Three times we have tried to help people with Parkinsons and they all stopped within a week although each said they were improving they gave up and quit. You only quit if you are ready to die.

I have had macular degeneration for years and if I run that program for 1 night a week my eyesight improves and maintains an ok level. If I gave you my complete medical list of problems you would start crying yet no need as I remove them one at a time and although I am an old fart now I will not die off easily or quickly. In reality it seems that cancer will be my eventual killer unless I keep killing it first. Bring it on!

Where people go wrong here is not using it enough, 5 minutes will never work.

If the unit only puts out low power it is no good, all of our units have amplifiers so you can get the max output=faster healing.

If it is an old signal generator you can only run 1 frequency at a time which is obsolete and a pain to have to recalibrate to a new frequency each time.

The signal generator is made cheaply in China for general electronics, it is not authentic rife equipment or made and designed and engineered for accuracy and severe health issues and run 10 frequency in sweep mode yet simple to use or reprogram in 6 minutes for a new health issue.

Bottom line a cheap signal generator is inferior to an authentic rife Tesla unit by far. It is the same as buying a 1 wheel bicycle or driving a sports car.

The best way for health and healing is to let the unit run on the right programs for long enough to remove them and you can do this day or night with 5 different methods.

The best way is direct contact or TENS pads and has the power and speed to heal and better to use 2 power outlets for double power output= faster results.

If you use the wireless it is fine to run 12 or 24 hours and share with your partner and will work from 6 feet to 1000 miles as Quantum energy with no time or distance limitations. Many practitioners work with patients 2000 or 5000 miles away by transmitting via RNA or DNA samples in a unit for several hours a day. More on this in the chapter Quantum Universal energy.

Photon light emits exactly the same frequencies as the TENS pads with potent light with the light to skin to penetrate the skin with healing frequencies, the light is compact and fits nicely in a bra or under a t-shirt while sleeping, the bulbs do not become hot yet are very effective and preferred by people who do not like TENS pads. We have had rave reviews from customers and women prefer this method.

Some people prefer the older method of copper hand held tubes and it has a better transmission yet you do not need to hold them in their hands, rather place them at your hips and your underwear will hold them nicely in place or socks work well under the feet while sleeping.

Our plasma light is fairly expensive yet has the most power output with over 2500 V/M ideal for clinics or people with severe or terminal illness. Here one should think of the sun and remove clothing so the light penetrates the skin for max healing effect and close range so 2 feet or closer for severe illness.

There are other options and methods provided by eBay or Amazon such as gloves or socks, additional TENS pads or cables, extension cables or metal rods. A nice feature they have is the lithium battery which fits perfectly to any Tesla unit if you go into the wilderness with no power

access, they can last 2 to 5 days pending on the size and are easy to recharge. Another alternative is a 12v motorcycle battery with solar panel for when not if the grid goes down. We have been in SHTF for 2 years already so be ready.

You can also use a 12v cigarette lighter adaptor in a vehicle.

The worst type of unit to use is a signal generator that is complex and frustrating to use with poor to zero results, rather than spending a little more and getting real authentic equipment. I think nothing of the Spooky outfit and the 2 I bought went in the trash in 1 day.

The simple outlook is use the right equipment and just let it run on the right programs and day by day your problems will be reduced. Never expect miracles in 5 minutes, be realistic and I always find those who are determined always win compared to those who just try and see for 1 hour, this is the wrong approach to a fantastic healing field and tool.

Chapter 4

The Quantum Energy Field

Quantum energy or mechanix is very complicated and a world of atoms yet having the most immense power in the universe and we humans can barely understand it and most have a headache trying to describe it.

The top scientists in the world laugh as they know, we cannot control it or manipulate it or even watch it work. The idiots as cern are playing with fire and will be burnt. This is the pure light or god particle in every atom around us and in us and the universe.

The answer is to gently tap into it and patiently wait for it to activate.

Tips with our Quantum Wireless

Our Quantum wireless has a magnetic field and 2 copper plates 1 negative and 1 positive. By placing your hair and nails sample = RNA between them and plugging the unit into the Tesla, we activate the quantum field and over any distance. To go further you can add a blood sample on a postage size tissue = DNA and the mix of 3 is very potent for best results.

After several weeks or months the magnetic field drops as a magnet does lose its energy with time. If you have an EMF tester you can clearly see what the EMF is and these only cost around \$15 so it's worth having and you can check your home and wifi or 5G and be worried or able to fix it.

If the Quantum magnets show below 200 V/M simply place 2 new magnets on the top and bottom of the Quantum and the field will be strong again and these are inexpensive perhaps \$1 each. If you use larger magnets the field will be stronger and give better results.

This technology is already used for over 40 years yet by very few, perhaps it is time we learn and tap into it. I can treat someone at a range of 10 feet or 10000 miles, simply requiring a good sample.

Chapter 5

Instructions To Use a Tesla Unit

Our Company began in 2005 and over the years we have developed over 9 products with over 1100 customers in 40 countries. Over 20% of our customers are Doctors or Clinics. We only work with the best American Engineers to ensure our products are 100% effective, accurate and yet simple to use. All units work the same simple way.

Quick Start

1. Plug the unit into power and get it ready to work.
2. Select the program you want to use by using 2 to scroll up or 8 to go down, when the cursor > is at the set you want to use push the Red key # to start and after therapy the other red key * to stop.
3. Place the TENS pads below your feet in the middle of the foot on each. or if you have the wireless Quantum, place a full teaspoon of hair and nails between the copper plates and plug into the Tesla unit.

Keypad Summary

2 - Scroll UP.

8 - Scroll DOWN. Holding 8 down will rapidly move down sets.

6 - Enter or Edit Frequencies

4 - Save New changes

- RED right lower key. RUN a set or to save a new frequency

* - RED left lower key, Stop running and return to the menu

Operating Summary

When the unit arrives just open the box and plug the unit into the wall. The LCD will come on and the unit is ready to work. An average person takes around 4 minutes to begin using a Tesla because it is automatic and simple to operate.

To Operate

Attach 2 TENS pads to each of the cable ends. Then attach TENS pads to the feet or over the infected area of the body. Select set to run and push # to run. Most people will do this 2 hours per

day. However it's best to use it while sleeping at night to have an 8-hour boost. This is 100% natural.

You can attach the TENS pads lightly to the skin for less power, or you can compress the TENS pads tightly to the skin with a 6-inch layer of sticky tape over the pad to increase power by 20%.

If you feel the TENS pads get a little warm or slightly itchy, this indicates a good power level. If the TENS pads become very itchy or you feel a slight hot/burning sensation indicates the power is too high - just turn the power down a touch. Or you can place the TENS pads under your feet as that is the toughest skin on the human body. We have had a few clients who just went to full power and had red marks from the TENS pads as they did not start therapy with medium output!

We use Ultrasound via the TENS pads and suggest under the feet, as the frequencies radiate down to the feet and up to the brain. This is 100% safe and natural yet deadly to disease on a cellular level - we kill disease here and quite rapidly as we know what frequencies to use and rely on you to run them and feel the results but never in 5 minutes.

The TENS pads per set can last for 4 to 6 days and replacements are inexpensive to order from Ebay or Amazon. Any size pad is ok but you need a 2mm connector as the cable pins are 2mm.

Power

This is controlled by the knob on the top or bottom of the unit and has a white stripe. We always tell you where the best power setting is - normally at 12 o' clock and for medium power output. Only make small adjustments - turning right is power up and left is power down so an average person will be happy at 12 o' clock or 1 o' clock if you like higher power. For children, an 11 o' clock position is suggested.

If using the wireless and with TENS pads under the feet full power is always best-knob fully clockwise, this way you have a double therapy at full power.

The Best Way To Use a Unit

Sleep with it running 8 hours a night and let it run in the background. What this does is break down an illness to remove it. You can feel it working only in low frequencies and when they go above 8000 Hz you won't feel them until they drop back to the low frequencies. There are 10 frequencies in a set and we always use 10 to kill a disease with a cycle being 1 minute with each frequency. So 1 full cycle is 10 minutes or 6 in 1 hour.

For some types of disease, you will go into detox and may feel symptoms of a mild headache or sweating -smile then as when the detox stops the illness is removed. Detox can last for 20 minutes, up to several hours if removing a serious disease. If you sleep while doing this, you won't feel

detox. Many times you will realize the illness has gone yet you felt nothing whereas Lyme will always have detox but is easily removed in under 12 hours therapy.

If you have 1 or more forms of Virus, only work on 1 at a time. Let the frequencies remove it before going into detox on another, like staying on an antibiotic pill until the course is finished. An average virus can be removed in 6 to 16 hours and when you feel all signs and symptoms gone, it is removed.

This works for over 3500 forms of illness since 1934. It is important for you to start seeing results so the formula is simple. Use the right frequencies x right power for you x time.= result.

We always notice that clients who get good results in a short space of time are the ones who sleep with a unit running, while those who just use a unit a few hours a week get lower quality results. Even a person with 5 major forms of illness using this seriously can be healthy again in under 4 weeks.

If you have ordered the Tesla photon light, this is used with the TENS pads and is placed with light over the skin to radiate down into the body to repair damage. This cuts down therapy time using both the TENS pads and light.

To Program a New Set of Frequencies

1. Say you want to treat for parasites. Look up the set of frequencies needed from the list at the end of this book – Parasites general comprehensive 160 300 680 900 2500 5500 13930 93500 356720 451170. There are always 10 frequencies from low to high.
2. Select the Set you want to reprogram.
3. Place the cursor at the set to enter.
4. Push 6 to enter. You will see F1.
5. Press 6 again to edit it. You will see the flashing cursor at the first digit.
6. As 160 is the first frequency, enter 000160 then push # to save.
7. Push 8 to go to F2 and press 6 to edit F2.
8. Enter the next numbers, 000300, and press # to save.
9. Press 8 to go to F3 and 6 to enter... Repeat the same sequence. It's easy after the first time.
10. Once you have entered 451170 at F10, the last frequencies in the Set, push # to save and then finally number 4 and will show "Saving changes". Now it is programmed in.

These units can be programmed with Hertz and several lists are available. Our most accurate current list is emailed to you when you purchase and these are all in Hz, so type in exactly as listed.

The Clinical units now have a larger screen and work the same way as the above, so all units are easy to operate and reprogram as you need over time. If you ever get stuck, just turn the unit off

and on again to reboot. If you have one of our latest units, you can adjust the screen display by pushing * and release when the screen is most clear for you.

When you start programming just start slow as no need to rush and here is where two problems can occur.

1. You adjust the screen display while programming, this is easy to correct if you see white squares, just push the left red button * and release again when the screen is clear again.

2. If you make several errors, the screen can go a bit crazy with abnormal images or displays. Stop the unit, pull out the power plug, wait 2 seconds and reconnect to have a normal screen and go back to programming slowly, most people get this in an hour and some will take a little longer yet this is a simple sequence.

Please be careful with a unit as a hard impact can damage the screen as in falling onto a hard floor and the same happens with an iPhone or the internal electronics can be damaged in which case any phone or used computer repair store has all the parts and a nominal repair charge. In the past 8 years only 1 customer damaged a unit yet cost only \$50 to repair in 1 day.

To program we always use 6 numbers so if the first is 20hz you enter that as 000020

If the 4th is 1500 enter as 001500, if the next is 33445 enter as 033445 and if it is 6 digits just enter as is so 987650 is entered exactly the same.

The sequence is always #86 after entering the frequency and always at F10 only push # after entry then 4 and you will see it say "SAVING CHANGES".

Feel free to contact us to assist and once you have done 1 program you will be able to do any on the list of 3700 diseases and change over time in about 6 minutes per program.

Chapter 6

Side Effects & Biofeedback of This Natural Energy

Your natural frequency and energy will rise. If you use this heavily as in 12 hours plus per day or on the wireless you may feel tired as vast energy flows through you on a small scale below 50 millivolts which is not 110 volts. This is called the Herx effect and I do not mind it as I am a heavy user and a mild tired feeling is the least of my worries.

Most people after a few weeks will start to comment they feel the power is dropping or becoming weaker, this is not so, you are simply adapting to the tool and your skin sensitivity is adapting so the power just feels more mild yet is the same and lasts as long as the life of the unit, 5+ years.

Maurice is a good example of this now, age 80+ he made this comment after a few months so we suggested if he wants more power output he can use an amplifier again on eBay or Amazon around \$20 and it will double the output power if you want to feel higher power yet is not essential.

He is also interesting in that he uses his small unit all the time and changes frequencies to meet his old age. I know he will easily live 10 more years and he mentioned he feels this is addictive as his body wants and needs it. At the age of 70 or 80 you can be sure your cells and body are tired and need all they can get in natural healing.

Never in 17 years have I felt one or heard of one negative complaint or side effect.

Biofeedback

You can use the TENS pads or wireless to test if you have an illness, if you feel no response you are negative and if you feel response or mild nausea you are positive so just continue therapy until the detox stops and it is gone. Average test can be 15 to 30 minutes. Cancer or Lyme or Covid will easily show in 15 minutes using both TENS pads and wireless for a 15 minute test.

The one effect a body feels when fighting a severe illness or high fever is detox as the body and cells fight the disease. If you use our unit and go into detox this is not bad, it simply confirms the frequencies are killing it and when you feel the detox stop it is dead and gone. Detox shows you are ill or see this in biofeedback and when detox stops tells you the issue is dead.

Upon using the Quantum, several people came back saying they did not feel good response yet then admitted they only had 1 hair and piece of nail in the unit. Please use a full teaspoon or tablespoon better or fine to share with 2 people for two reasons. First, you must separate the two copper plates to prevent them touching. Second, a solid sample will get a firm negative or positive response. If you feel the internal twinges it means Quantum energy is killing the disease and please let us know as only few to date have felt it, yet it is working all the time.

In my first test 2 years ago I only had hair and nails in and did not expect anything to happen in a biofeedback on general cancer program. Within minutes it responded and I felt pain in my hernia then in 1 minute a series of 7 twitches or what felt like 7 rapid small injections and it stopped. This felt very weird and no one was in the room near me. One day later the inflammation dropped and the early stage cancer was removed by Quantum. If anyone is in a similar disease and has a wireless unit I would expect the same result but do not ask for it or demand, this will be ignored. A series of internal twitches tells you Quantum is responding and where the disease lies, do not switch off the unit, let it finish the work and you would be one of the few to have had the Quantum cure at warp speed. Anyone can do this with an open mind.

Sarah in the UK had breast cancer and high anxiety, she ordered the Elite unit and went onto both the wireless and TENS pads. She was told by the hospital that her last scan showed her negative yet on running the Elite was horrified to find still positive, however reported back after 91 minutes the cancer was gone with all the detox. It took 2 more weeks to have her say the anxiety was reduced and feeling fine.

If you are running a program for an issue and feel no results tells you to change the program and when you feel improvement or detox tells you the frequencies are correct and fixing the issue. Detox is fine and normal as the body fights a disease and shows nausea or fever, if the frequencies take you into detox is fine and normal and when the detox stops it is dead and gone, so retest to confirm.

Some people want to avoid detox and stop the unit. This is dumb. One woman had a daughter with chronic lyme disease and immense suffering so I asked her to give the child mild sleeping tablets and run the unit for 1 night to remove it. She did not want to see her child in detox so let the chronic illness continue for weeks and needless suffering. This is stupid ignorance again.

Detox only occurs with certain issues such as cancer lyme or Covid, most show nothing and one simply kills it and feels completely normal.

There is very little in life that feels better than knowing that you have killed a major disease the natural way in your own home and time. Your Doctor would not like to know this. We have free will and freedom of choice.

Now the bioweapons are out over 2 years and in many forms many Doctors are leaving the old system and we enjoy working with those who start their own natural clinics. All humans will move in this direction in time as a natural law.

This is radionics and ultrasound used by wireless and direct and sound or light systems.

Chapter 7

Time and Healing

I have been using this technology for 17 years yet only using it very intensely the past 5.

Today I run the wireless 24 hours and change the program each 8 hours and this is effortless to do. At night I run the direct method to remove severe issues.

An average human is hit many times a year with different issues as we live on a planet with over 10000 types of disease.

An average illness can be removed in 8 to 16 hours or 1 to 2 nights which is remarkable for healing. A severe disease such as autism, epilepsy and dementia alzheimers can take a month or more as complex and very severe yet you can see improvements from the first week.

In just the past 2 days I have removed a severe bacterial infection in the lungs and cystic fibrosis, a severe lung disease so they were easy. Next, no problem.

I do not see this as a medicine or a pain to use. It is a simple way to stay alive with a bit of discipline.

The secret is sleep while healing to awake feeling 100% right and disease gone 100%. This is 100% natural therapy and innovation yet less than 1% of the world even know of it. This is why the global population will decrease from 8 to 5 billion within the next 3 years or less. When bioweapons are released all the innocent will suffer and in millions.

Online stores like eBay or Amazon can supply all needs from TENS pads to copper rods to lithium batteries or 12v batteries.

I keep a 12v motorcycle battery so when the power goes with the internet my solar charger will keep my unit operating non-stop.

Average time to remove an average disease is 8 to 16 hours.

Complex illnesses such as autism, dementia, epilepsy, Parkinsons, will take one plus month which is fast if you keep the discipline and use consistently.

Cancer has over 200 varieties, yet easy to deal with-do Biofeedback first to confirm positive, then constantly treat it to stop the growth and place it in die-off mode and hold it there and the tumors will begin to shrink and you can have a scan confirm this or retest when a Biofeedback shows clear, it is gone. Once positive from Cancer such as my case you must retest at least once a month to find it early, kill it early.

Chapter 8

Making Colloidal Silver, Gold or Other Precious Metals

This is a simple and quick process.

We supply all units now a terminal block with 4 screws or you can buy one at any hardware store for \$1.

You need a glass bottle with 1/2 or 1 liter pure water. Order 2 pure silver rods from eBay or Amazon around \$15. Attach them to the bottom 2 screws of the terminal block so they are parallel not touching. In the top 2 screws attach the tips of the Tens cable and not too tight.

Place the rods into the water but keep the terminal block above the water line.

Now run the colloidal program which is 5 x 1000 hz and 5 x 10000 hz. Only 15 minutes will give 20 ppm or 30 minutes will give double ppm or strong.

This applies to any metal or even copper that has many health benefits.

I am working on rods to make all items at 1 time using rods of silver copper and stainless steel together which gives hydrogen which is having rave reviews for health, also known as Kangen water. With this combo I can get all the items in a 1 hour session making colloidal silver, high copper content and alkaline high levels.

Copper has dozens of health benefits and if your hair has gone gray or white is a copper lack which can be corrected. .

Another item lacking in our diet today is iron so again you can order these rods or take the pill supplement.

If you are aging it is wise to take a comprehensive blood test to know your condition and what is lacking, you can even ask for a ph test to show your level of acidity=bad, or alkaline=great.

Chapter 9

Clinics: How to Open One or Expand

There are millions of people in the healing field as well as naturopaths, chiropractors, Quantum practitioners, nurses and Doctors.

Today many have a basic medical knowledge or understand disease and like the idea to help others yet have a normal income.

If you go to a Quantum practitioner with this type of technology the hourly rate is between \$50 and \$140 so it depends on your location and population.

We are already working with over 20 clinics around the world and some are small others large.

If you want a change in life and see the large changes due to pandemics or epidemics you can consider going in this direction and it is fine to start with one unit and build up or order a complete Clinic set up with all options. To use this equipment is simple and you always run the right program for the right condition.

If a customer walks in with back ache, run back ache and it kicks in within 4 minutes, or pain yet we always look for the root problem to remove or fix it.

I have heard many Doctors say lately in the last 2 years that cancer has exploded and people are moving from negative to stage 4 terminal in a very short time so one has to ask what is causing this? This is going to kill many yet it must be the climate change as a vaccine would never do this.

Cancer can be a hard one to deal with so always find it early and kill it early. First do a 10 minute biofeedback on cancer in general, if a person feels nothing they are negative, if any response, nausea, headache or pain is positive. In which case run that program until it has detox and the detox stops, it is gone. Stage 1 can be removed in 1 to 2 hours. Later stages will be longer. Stage 4 is hard and many die. Those who recovered took 4 to 6 weeks. Breast cancer is one of the easiest and brain cancer very tough and fast killing.

If a person goes into a Doctor with 5 problems, pills are the standard answer.

Let's say the person has HIV, dementia, severe arthritis, stage 2 cancer and syphilis, a nasty STD. In a natural clinic with many hours this person can be normal again within 4 weeks or less. Quantum healing is not normal medicine and far superior with the ability to work at warp speed on several issues and the TENS pads have the power and speed of healing.

There are billions living with disease and many have several. I have had 3 people with 15 plus forms of disease. An average person probably has 5 depending on their age and lifestyle.

If we look at drug addiction, the hard variety probably 10% of the population uses and many die young, the survival rate is low as most will not stop or quit. Alcohol is another big problem and the list is endless as drug cartels keep bringing new highs.

We can treat these issues or even smoking yet a person must be ready to stop.

If you are an ex nurse or Doctor I would be happy to help you set up and you start with yourself or family members to have a fast learning curve and ready to open.

If you are a clinic working with old methods we can upgrade you as many customers are saying today. Where can I find a Quantum clinic as I only want natural healing?

On the issue of bioweapons, our equipment can deal with 90% even radiation detox if the nukes fly. Some bioweapons are very devious as they have snake venom, mRNA, nanobots and these are very tough with no known method to kill them yet as they are a combo, we suggest Ivermectin, NAC, high vitamin C, zinc and vitamin D as a combo to reduce and remove. We can remove nanobots to some degree. The worms that are causing all the blood clots are not normal living worms. AI may be a better alien description and not even formaldehyde kills them yet. This is very strange and must be caused by all the bad weather lately.

I used to drink only rain water for 5 years and it tastes perfect yet lately had to stop as now it seems the self assembly robots are in every drop and probably globally.

If we are going into a WW3 with nukes, you must consider moving away from target zones or countries. There are still a few safe or neutral countries or islands.

In the UK with free health the line of people to see the NHS is around 13 million so the UK has a sick and aging population in dire need of new health natural clinics. Every country will be similar. In the USA now over 100 million persons say no to paying health care or cannot afford it.

I recently heard of an old fellow having to pay \$16000 for a trip to A&E just for high blood pressure. Wow. We charge \$1200 for a unit to treat 98% of disease and last over 5 years, way too low yet we do not chase money.

I have 4 units as I am aging and often use two: the Elite and Universal units. The latter now has double the power which equals faster recovery time so has become my favorite.

The photon light is very cool and powerful as we have done 5 upgrades in the past 2 years. The plasma light is expensive yet far more powerful for severe health issues so we have a complete blend of latest healing and innovation.

Covid has been a killer and decimated the global economy so we will see how things develop yet it is still eating at every population as it develops or transmutates into version 8 or 12. Natural Covid is easy to kill and be immune in 7 hours.

I hear that Japan has vaxxed 91% of the population three times and Israel 7 times so expect large population drops due to the weather.

To open a Clinic- Location, population, parking, easy to find.
I would consider these above options and ideally have a space with 2 offices of which one has a reception and seating for a practitioner and two clients, the other room would need 2 beds for longer or overnight treatments. This simple arrangement can have 4 customers being treated at one time using 4 units with only one practitioner.

Some prefer to work from home and modify one or two rooms for a home practice and this is fine and lower cost.

The beauty with our equipment is ease of use and fully automatic. Even if a person has 5 issues to be repaired and is fine and normal, many of us deal with insomnia, anxiety, stress is a major and backache or spinal issues. When stress is reduced a person feels happy and relaxed again or to balance the 7 Chakras is a primary need as many have never done this.

Most clinics charge by the hour or can be done by the disease.

I would suggest a two hour session for most customers as one hour is a bit on the short side.

You would find after a few months your clinic would become popular and busy as advertising and word of mouth spreads that there is a natural effective option to the old ways and pills. Many customers become delighted with Quantum and energy healing and regular bookings.

I would have 1 double clinic unit Universal with 2 photon lights and Quantum and one or two Elite units to start, another step up is to have the plasma light as well and with a higher charge per hour.

Chapter 10

Our Quantum Technology

Tesla 25 is our most economical rife machine for sale.

This unit is pre-programmed for over 20 forms of primary top illness with an additional 5 settings for you to enter your own desired therapy.

Two methods of use: TENS pads & scalar technology quantum wireless.

Size: 3 x 7 in.

Tesla 150 Elite is the best value rife machine for sale.

This unit is for serious health issues and is typically used in clinics or homes with many forms of disease. It has a larger screen and 8 times more memory than the T25. Preprogrammed for 129 sets and an additional 21 available to change at any time.

Two methods of use: TENS pads & scalar technology quantum wireless.

Size: 8 x 3.5 in.

Universal Pro is the most powerful & personalized rife machine for sale.

After a year in development, this unit has 200% more power and 200 programs. If you are dealing with one or more severe health issues this is the right unit for power and speed in healing.

Three methods of use: TENS pads, quantum wireless and photon light.

Size: 9 x 6 in.

Tesla Plasma is the Deluxe Edition rife machine for sale.

This is the latest in the field that includes the plasma light and Elite desktop.

It also includes the TENS pads and quantum wireless.

Size: 18 x 16 x 4 in.

Tesla Clinic is the best clinical rife machine for sale.

Designed specifically for families, medical offices or alternative practitioners. A double unit with two of the latest Universal Pro models.

Three methods of use: 2 TENS pads, 2 photon lights & or 2 scalar technology quantum wireless. With the purchase of this model we are on call to aid you with advice or assistance so you are up and running in no time. Size: 11 x 8 x 4 in.

Chapter 11

Supplements

We should know by the age of 5 what supplements must be taken daily to live. By the age of 30 you should be an expert.

I only learnt by age 65 that I must take Magnesium Potassium B complex etc etc daily to live and survive.

Youtube is an excellent channel to learn and DR Mandell and DR Berg give outstanding free tips of what and why to take.

Your kitchen contains excellent herbs and spices, use Turmeric, Cayenne pepper if you take a teaspoon a day will clean your arteries and reduce food intake 40% for starters. 40% of the global population is fat and overweight.

We do not need to eat 3 times a day. I have gone onto a spartan diet of bananas for breakfast and lunch and a large salad for dinner. I would prefer steak and potatoes so only have this once a week. Health improvement 80% weight reduced 50% fat. Now I must go to the gym but I am lazy so don't want to, so I have brought in a gym to force my lazy butt each day to work out.

If your hair has gone gray it is due to a lack of copper to recover; or Iron is needed as a major supplement.

Pink himalayan salt has 84 nutrients with essential elements and a pinch should be taken daily at least.

If you are having neurological problems use Alpha Lipoic acid, if you are one of the millions that had the vax shot and looking for relief the latest update is NAC, Ivermectin, Zinc, D3, Magnesium and Potassium with high C supplements.

Chapter 12

Troubleshooting & FAQs

The only issue a unit can have is if not plugged in properly for power. The LCD will show erratic power on and off in such cases. The only way to damage a unit is to drop it over a hard floor as there are sensitive electronics in each unit. Please do not drop a unit. Just leave in a safe place or near your bed and it will last over 5 years.

If you find the screen adjusts and see white squares, the screen adjust is the left red key *, just hold down several seconds and release when the screen is clear again.

If you have ordered the Quantum wireless please put a full teaspoon of hair and nail clippings in it, some are just putting 2 hairs in and then get bad results. The wireless is beyond outstanding as pure Quantum energy. Excellent for biofeedback and fixing problems and the lazy way for lazy users or intelligent options. Any distance.

If you are using the Tesla light please note it takes a lot of power so keep the power at 12 o'clock or 60%. The Tesla can only run 2 items at one time or you will use too much power and blow out the power plug. So light and wireless ok or wireless and TENS pads ok. The light comes on when the start button is pushed or off when the stop button is pushed. The light emits the same frequencies as the TENS pads so a gentle way of healing and fits nicely in underwear bra or shorts as the elastic holds it in place and is always light to skin to penetrate.

The TENS pads give the highest power and speed of healing and are simple to use while sleeping = fast results.

This is 100% natural so no need for fear, that would be ignorance.

We are finding most people after 2 weeks just use the wireless 12 or 24 hours a day so if you are treating 3 health problems just change the setting each 4 or 8 hours in full automatic mode and use the TENS pads or light occasionally or when needed to remove a serious disease.

Please contact us if you become stuck anywhere or have questions: info@rifemachineusa.com

Frequently Asked Questions

How can I test if the unit is working?

If you place the TENS pads on soft skin such as the stomach you will feel low frequencies working. Or you can place the tips of the Tens cable on your lips and will feel the buzz or tingle when the unit is in run mode. Best to test on a low frequency such as below 100Hz.

Is this Science safe and easy to use?
100% natural and safe, our units are designed for simplicity with 2 red keys to stop or start and fully automatic. Signal generators are not automatic.

I have 3 serious health problems. Can this work for me?
Yes, we can work on 98% of disease and the only person who cannot use this has a heart pacemaker. Tinnitus and Cataracts are slow treatments.

I have Lyme disease, will this work?
Yes we have helped over 40 people as Lyme is one of the easiest and quickest to remove in under 12 hours.

What is the average time to remove an illness?
An average illness can be removed in 8 to 16 hours or 1 or 2 nights while sleeping. A severe disease such as Dementia or Autism can take months as highly complex. A virus or bacteria can be removed in 1 day. Covid is 7 hours. Ebola 8 hours. We can work on any disease except the 3 issues mentioned above.

I have 2 types of Cancer, can this work rapidly?
Yes for the early stage and slow for stage 4. Always find it early by Biofeedback and remove it at an early stage. 90% of people contact us in stage 4 and this is very late and can take 4 weeks of intense therapy. We work on over 200 types of Cancer.

Is the Biofeedback fast and accurate?
Yes, it never lies provided you run a test on a program long enough, average time 10 to 15 minutes, if you feel response or nausea is positive to feel nothing is negative. You simply run the program to test eg, covid, cancer, lung disease, if positive you run that program until a new test shows negative. This is priceless and can save thousands from cancer or a severe infection or virus.

Why should I buy a Tesla or what is the best buy?
There are several manufacturers who claim to sell rife machines when they only sell signal generators, which are not the same. An authentic rife machine targets health & healing specifically. Tesla machines are fully automatic as a mini computer, simple to use in 2 minutes, no internet or external computer needed and can run on a 12v battery when SHTF. You must get a real authentic unit or you will just waste time and money and learn the hard way. Our Elite unit sells for \$1,295 or you can buy an alternative version for \$8,000 that is no better.

Chapter 13

Tesla Tec Users Testimonials

My son has reduced from 3 seizures a week to one each 2 weeks. I will start on autism next.

Tracy (EU)

We have a large family so I ordered the Elite and in 2 weeks we had 3 problems removed. I am ordering 3 more please.

Jenny (USA)

Quick update. The change with Alfie (our dog) is incredible. He's like a new dog. We thought we had lost him. He's up and running around again this morning after 20 hours on the right cancer frequency (lymphoma). I can't thank you enough for the support.

Chris (UK)

I just flew into Mexico for a month and went down with Long Covid in the first week, which was very unpleasant. My Dad flew in a Tesla so I used the wireless for 4 days and TENS pads for 3 nights to feel it break and die-off. Only have smell to fix and grateful to be free of Covid and immune.

Catherine (MX)

I had chronic sciatica for 20 long years. Used a Tesla 3 nights and now pain free.

Paul (USA)

I am pleased I ordered the Universal 5. After five days of use. Radiation detox is working very well, and I am much, much better.

Dr. CS (USA)

I am delighted with my machine but as you said, the right frequencies for the right illness at the correct power. I have had detox in form of severe constipation and Lyme and headaches but the machine just confirms my belief that many humans are very ignorant and that the world/universe is an intelligent place with solutions to all problems-my vision has improved and after one month of Rife I feel and look years younger!!

Rachael (EU)

I only used the Quantum in mid March to do biofeedback and check if I had any problems. I lay down 3 meters from the unit after running general cancer and had seven mild shock waves within 10 minutes that lasted 55 seconds and stopped. It not only found a tumor yet demolished it in under 1 minute. Gotta love this new way that already came out 40 years ago and my first Quantum healing experience.

Alan (UK)

I have had dementia for years. After 2 months on a Tesla my mind is clear and the "feeble mind" is gone.

Liz (CA)

I had extreme Lyme, chronic condition, in my first 2-hour session, I had a massive detox and it was quite painful but Vega biofeedback showed that 90% of Lyme was removed in 2 hours so this is quite remarkable Science. Many Thanks.

Dr. WB (UK)

I bought the Tesla 25 as I have lived with 2 serious diseases for over 10 years and am sick of being sick. After 14 hours therapy both sickle cell and my STD are breaking up rapidly. I have a new life again after 23 total hours of therapy.

Barry (USA)

I ordered an Elite unit 3 weeks ago to deal with high anxiety and breast carcinogens. Within 91 minutes of treating it by wireless and the TENS pads, the pain stopped and 100% Cancer negative. Delighted. Anxiety reduced and feeling good.

Sara (UK)

To date we have worked with over 50 cancer cases and please remember if you start early Cancer is easy to deal with, if you move into late stage 3 or 4 you need to focus and stop it, then kill it off and it will be tougher and longer. If you use the Biofeedback, it is priceless to find Cancer early days and remove it quickly or if in Stage 4 will take constant dedication to kill it or be killed so late stage is no joke and many are lost here.

Breast cancer can be the easiest to deal with or brain cancer requires immediate therapy.
